

SPRAYMATCH

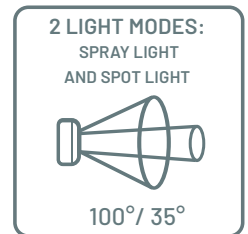

Rechargeable EX PROOF work light for spray guns

SPRAYMATCH puts light exactly where the paint lands. Developed in close collaboration with professional auto body painters, this work light mounts directly on your spray gun's paint cup and fits all gun types and brands. It installs in seconds without tools, suits both right- and left-handed users, and is EXPLOSION PROOF zone 2/22 certified for spray booths. By revealing- ing coverage, overlaps, dry spray, and runs as you work, SPRAYMATCH helps you avoid costly rework and finish right the first time.

Two modes make every task precise: SPRAY LIGHT projects a wide, uni- form beam that tracks the spray fan for optimal visibility of paint coverage, while SPOT LIGHT concentrates illumination for dark or confined areas such as edges, bumpers, and fender lines. Each mode offers three bright- ness levels: 10 %, 50 %, and 100 %.

Compact and lightweight, it maintains optimal balance for comfortable spraying. The lens is protected by exchangeable covers with tear-off layers to resist overspray and scratches.

Additional protection covers (5 pcs.) with 5 tear-off lens layers optional. (Item no. 03.5977)

TECHNICAL SPECIFICATIONS

20/100/200 lumen, Spot: 10/50/100 lumen
3 Levels
