

UV-GUN

LED light for UV curing of large sized paint repair areas

ORIGINAL
SCANGRIP
SINCE 1906

UV-GUN is an extremely powerful LED work light for very fast and highly efficient UV curing of large paint repair areas. It provides long operation time and is rechargeable with exchangeable battery.

SCANGRIP has taken advantage of new, high performance battery technologies and invented an innovative concept of flexible and reliable power supply. Easily you can insert a new, fully charged battery and continue the work while another battery is charging.

Featuring high-quality components and active cooling, UV-GUN has a long lifetime and keeps a high performance level throughout the daily operations. No heat is produced on the panel or the paint during the curing, allowing curing of plastic parts or any heat sensitive material.

UV-GUN has been upgraded with a LCD display enabling you to see the remaining battery level and ongoing curing time. With this feature, you will know the exact curing time of each operation and see when it is time to exchange the battery.

UV-GUN is supplied with a solvent resistant glass lens.

Supplied with display for battery life and curing time

Exchange battery

Delivered in a practical nylon bag including exchangeable SPS battery, SPS charger and UV protective glasses

TECHNICAL SPECIFICATIONS

UV LED

Irradiance at 10cm, Minimum >68mW/cm², Center 340mW/cm²

Irradiance at 56cm, Minimum >6mW/cm², Center 14mW/cm²

UV peak wavelength 395-400 nm

Curing area: 250cm² at 10cm distance / 3600cm² at 56cm distance

11.1V / 8000 mAh Li-ion

40 min. operation time

2 hours charging time @80%

IP30

IK06

1.89 kg incl. battery

Incl. SPS BATTERY 03.6004 and SPS CHARGING SYSTEM 50W 03.6007

UV-GUN

Item no. 03.5803
